Overland Park, KS

Education

(2025-Present)

Masters in Computer Science

University of Central Missouri, USA

(2016-2020)

Bachelors in Computer Science

VR Siddhartha Engineering College, India

Skills

Languages

Java, JavaScript (ES6+), SQL, HTML5, CSS3

Framework

ReactJS, React Native, Spring Boot

Experience

Apple (via Infosys) - Specialist Programmer

Hyderabad, India | Oct 2020 - Dec 2024

- **Played a key role in front-end development for the UI layer of Apple's internal ETL platform**, used by around 5,000 employees in the Global Business Index division.
- **Designed and developed two high-visibility home pages** that acted as entry points for key data engineering tools, improving navigation and feature discoverability.
- **Upgraded the entire application** to the latest React version and implemented new UI components and logic optimizations, improving overall front-end performance by about **50%**.
- **Developed and optimized RESTful APIs using Java (J2EE)** to serve complex ETL data and configurations to the front-end. Implemented parallel API execution to improve backend performance by **20%**.
- **Designed and optimized SQL queries** for data staging and time-series operations, resulting in faster response times for data-heavy interfaces.
- **Created unit and integration tests using JUnit** to maintain service reliability and reduce production issues.
- Recognized as a **key contributor** for UI modernization and overall platform performance improvements within the GBI division.
